EDUCATION

North Harbor State University, North Harbor, FL

B.S. in Statistics, expected May 2027; Minor in Business Analytics

GPA 3.7; Dean's List Fall 2024 through Spring 2026

Relevant coursework: Regression Analysis, Database Systems, Data Visualization, Probability

Activities: NHSU Data Science Society (treasurer), Intramural volleyball

Honors: NHSU Honors Scholar, 2025

EXPERIENCE

Data Analyst Intern, North Harbor Housing Group, May 2026 - Aug 2026

- Cleaned 18,000 rows of rental records with pandas, removing 1,200 duplicate entries before monthly reporting.
- Wrote SQL queries to pull occupancy numbers and cut report preparation from 6 hours to 2 hours.
- Built a Tableau dashboard that staff use each week to track vacancies by neighborhood.

Research Assistant, NHSU Social Science Lab, Jan 2026 - Apr 2026

- Organized survey responses from 400 students into one tidy dataset using Python and pandas.
- Created charts and summary tables for a faculty report on study habits.
- Checked data entry against paper forms and fixed 75 mistakes.

PROJECTS

Campus Bike Share Analysis (Python, pandas, Tableau), Apr 2026

- Analyzed 50,000 trip records in pandas and found the busiest hours and stations.
- Built a Tableau dashboard that maps trips by hour and day of the week.
- Shared the dashboard with classmates and fixed two chart labels they found confusing.

Movie Ratings Explorer (SQL, SQLite), Dec 2025

- Built a database of film ratings and wrote queries that rank titles by genre and year.
- Added indexes that made the slowest query run in under a second.
- Documented each table and column in a short data dictionary.

Housing Price Model (R, regression), Oct 2025

- Fit a linear regression on 2,000 home sales and checked residuals for problems.
- Wrote a two-page summary of the results for a class presentation.
- Compared two models using adjusted R-squared before choosing one.

SKILLS

SQL, Python, pandas, NumPy, Tableau, Excel, R, SQLite, Git, Jupyter, matplotlib, regression, data cleaning, dashboards
