EDUCATION

North Harbor State University, North Harbor, FL

B.S. in Computer Science, expected May 2028; Minor in Mathematics

GPA 3.6; Dean's List Fall 2025 and Spring 2026

Relevant coursework: Data Structures, Databases, Software Engineering, Algorithms

Activities: NHSU Coders Club (member), Hack Night volunteer

Honors: NHSU Merit Scholarship, 2024 - Present

EXPERIENCE

Junior Web Developer, Oakline Print Shop, Jan 2026 - Present

- Rebuilt the online order form in React and reduced page load time by 30% by compressing images and splitting code.
- Built an AWS Lambda function that emails customers a proof of their order within a minute of checkout.
- Fixed 12 front-end bugs reported by staff and added tests for the order form.

Data Assistant, Campus Survey Office, Aug 2025 - Dec 2025

- Wrote Python scripts to clean survey data for a campus office, cutting manual work by 5 hours a week.
- Helped migrate weekly reports from Excel to SQL.
- Documented the report steps so new student workers could run them alone.

PROJECTS

Course Planner Web App (Flask, React, PostgreSQL), Mar 2026

- Built an app that lets students drag classes into a four-year plan and flags missing prerequisites.
- Set up automated deployments with GitHub Actions so every merge to main goes live after tests pass.
- Wrote 25 unit tests for the planning rules using pytest.

Library Book Tracker (Java, SQLite), Nov 2025

- Created a command-line tool that tracks borrowed books and due dates.
- Added search by title, author and subject with simple text matching.
- Stored all records in a SQLite file so data survives restarts.

Weather Dashboard (JavaScript, HTML, CSS), Jun 2025

- Built a one-page site that shows a five-day forecast from a public weather API.
- Added a dark mode toggle and saved the choice in the browser.
- Cached responses for ten minutes to stay under the API request limit.

SKILLS

Python, JavaScript, React, Java, SQL, PostgreSQL, SQLite, HTML, CSS, Flask, pytest, Git, GitHub Actions, AWS Lambda, Linux
